EDUCATION

Pamantasan ng Lungsod ng Maynila *August 2026*

Bachelor of Science in Information Technology *Magna Cum Laude*

Relevant Coursework: Software Development, Web Development, Database Management, Data Engineering, Data Analytics, Business Analytics, Project Management, Software Engineering, APIs, Cloud Integrations, Software Quality Assurance

---

WORK EXPERIENCE

Bank of the Philippine Islands | *Integrations and Orchestrations Platform Intern* *February 2026 – May 2026*

Makati City, Metro Manila

- Pitched digital transformation proposals to key stakeholders, aligning platform initiatives with institutional goals.
- Authored detailed Business Requirement Documents (BRDs) and system use cases to define scopes and development roadmaps.
- Formulated and validated Postman API specifications, streamlining backend integration and data reliability.
- Engineered high-fidelity Figma prototypes and responsive React interfaces, bridging UX design with production frontend code.

PROJECTS

Global Tech Layoffs Pipeline & Exploratory Analysis | *MySQL, SQL Modeling* *September 2026 - October 2026*

- Built an end-to-end MySQL pipeline to clean, deduplicate, and standardize 2,360+ global workforce records using CTEs and ROW_NUMBER().
- Imputed missing industry values via self-joins and standardized date types to ensure schema integrity.
- Analyzed trends across 386K+ laid-off roles using rolling sums and partitioned DENSE_RANK() queries to identify top-impacted companies by year.

3Whites | *Mobile App Developer & AR Integration Engineer* *January 2025 – June 2025*

Project Overview: AI-Driven Powerlifting & Progress Tracking Android Application

- Mobile Frontend Engineering: Built and deployed responsive UI interfaces for an Android application, ensuring smooth user onboarding and clear visual layouts for automated progress tracking.
- AR Optimization & Bar Path Tracking: Refactored core Augmented Reality (AR) component logic to eliminate performance bottlenecks and frame latency, delivering real-time, fluid bar path trajectory visualization for athletes.

TechSync | *Front-end Developer and Project Manager* *June 2025 – November 2025*

Project Overview: AI-Powered Developer Collaboration & Upskilling Platform

- Directed and managed the end-to-end development lifecycle using Agile Kanban methodologies, ensuring strict adherence to team timelines, project milestones, and successful platform delivery.
- Developed a collaborative learning platform focused on streamlining developer workflows and professional growth.
- Implemented a Skill-Matching Algorithm that dynamically suggests independent projects and learning paths based on detected proficiency levels.

MindCare | *Frontend Developer* November 2025

Project Overview: AI-Assisted Psychiatric Appointment Scheduling & Mental Wellness Platform

- Spearheaded agile project workflows and designed an end-to-end psychiatric booking system integrating dynamic provider availability schedules, automated status transitions, and role-based access for patients and clinicians.
- Architected an AI-driven mental health triage engine utilizing structured prompt schemas to evaluate patient stress indicators, generating calibrated severity scores alongside actionable, non-clinical intervention strategies.
- Engineered a scalable PostgreSQL backend on Supabase with Row Level Security (RLS) policies across users, clinical evaluations, and appointments, coupled with a responsive frontend built for low-friction patient onboarding.

TECHNICAL SKILLS

Languages and Frameworks: JavaScript, Next.js, React.js, Node.js, Postman, PostgreSQL, Vite, MySQL, HTML5, CSS, TailwindCSS, XML, Kotlin

Tools: PowerBI, Tableau, Excel, MySQL Workbench, VS Code, Figma, Android Studio, Github, Jira, Codex, ChatGPT, Claude, Gemini, Google AI Studio

---

CERTIFICATES

Associate Data Engineer | *DataCamp* October 2026
