Education

Pamantasan ng Lungsod ng Maynila

August 2022 – May 2026

Bachelor of Science in Information Technology

GWA: 1.43

Relevant Coursework: Software Development, Web Development, Database Management, Project Management, Software Engineering, APIs, Cloud Integrations, Software Quality Assurance

Work Experience

Bank of the Philippine Islands | Integrations and Orchestrations Platform Intern

February 2026 – April 2026

Makati City, Metro Manila

- Authored and pitched comprehensive digital transformation project proposals to key corporate stakeholders, aligning technical platform initiatives with overarching institutional goals.
- Developed and structured detailed Business Requirement Documents (BRDs) and complex system use cases, establishing clear project scopes and actionable roadmaps for the development team.
- Formulated and validated precise API contract specifications using Postman, streamlining backend integration requirements and ensuring data reliability across platform workflows.
- Designed and developed high-fidelity Figma prototypes and responsive React interfaces, bridging the gap between UI/UX design and production-ready frontend code.

Projects

3Whites | Frontend Developer and Documentation

January 2025 – June 2025

Project Overview: AI-Driven Powerlifting & Progress Tracking Android Application

- Engineered and implemented responsive frontend interfaces for a specialized powerlifting Android application, ensuring seamless user onboarding and clear visual presentation of automated progress tracking data.
- Optimized and refactored existing Augmented Reality (AR) component code to address performance bottlenecks, reducing application lag and delivering smooth, real-time bar path visualization feedback for athletes.
- Authored and structured comprehensive technical project documentation, translating complex system flows and backend logic into clear reference materials that accelerated team alignment and development velocity.

TechSync | Front-end Developer and Project Manager

June 2025 – November 2025

Project Overview: AI-Powered Developer Collaboration & Upskilling Platform

- Directed and managed the end-to-end development lifecycle using Agile Kanban methodologies, ensuring strict adherence to team timelines, project milestones, and successful platform delivery.
- Developed a collaborative learning platform focused on streamlining developer workflows and professional growth.
- Implemented a Skill-Matching Algorithm that dynamically suggests independent projects and learning paths based on detected proficiency levels.

Leadership & Volunteer Experience

PLM Google Developer Student Club (GDSC) | Noogler

2023–2025

- Engaged in Google-led technical workshops and developer events to expand foundational knowledge in modern web development frameworks and programming methodologies.

AWS Cloud Club – Haribon | Software Engineer & Data Engineer Skillbuilder

2024-2025

- Completed hands-on technical training sessions on core AWS services, gaining a practical understanding of scalable cloud architecture and data handling tools.

Technical Skills

Languages: JavaScript, Python, C++, C#, Java, SQL, HTML, XML, Kotlin

Frameworks and Tools: Next.js, React.js, Node.js, Google Cloud, VS Code, Figma, Supabase, Android Studio, Postman, PostgreSQL

Project Management: AGILE, SCRUM, JIRA, GitHub
